

AYYUBIAN AR RAUFAN KAMAL

FULL STACK DEVELOPER

+62 89523689349 | ayyubian07@gmail.com | [Ayyubian Ar Raufan Kamal](#) | [Web Portfolio Ayyubian Ar Raufan](#)

Tangerang, Indonesia

Frontend Developer with hands-on professional experience maintaining and enhancing production web applications using **React.js**, **TypeScript**, **Inertia.js**, and **Tailwind CSS**. Experienced in debugging and resolving UI and functional issues, implementing frontend enhancements, developing reusable components, and integrating frontend features with Laravel-based backend systems. Familiar with collaborative development workflows including Git, GitHub, pull requests, code reviews, and working within an existing production codebase.

Also experienced as a **Full-Stack Developer** through independent projects, developing complete web applications across both frontend and backend layers. Skilled in building RESTful APIs using **Node.js** and **Express.js**, implementing authentication and authorization with JWT, integrating MySQL and MongoDB databases, and developing backend services using **Golang**. Experienced with API integration, database design, deployment, Docker, and modern full-stack development workflows.

Technical Skills

- **Frontend Development:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Inertia.js, Responsive & Component-Based UI Development
- **State Management:** Zustand
- **Backend Development:** Node.js, Express.js, Golang (net/http), Laravel, PHP, RESTful API Development, Authentication & Authorization (JWT), Password Hashing (bcrypt), Email Verification (Nodemailer, Mailtrap), MVC / Layered Architecture
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL (CRUD Operations), Database Schema Design, Connection Pooling (mysql2)
- **APIs & Tools:** Axios, Postman, Git, GitHub, npm, Yarn, VS Code, Herd, Composer, DBeaver
- **Styling & UI:** Tailwind CSS, Bootstrap, Material UI (MUI), Sass
- **Devops & Deployment:** Vercel, Railway, Koyeb, Docker, Environment Variables (.env)
- **Design & Prototyping:** Figma.

Projects

Web Portfolio (Next.js & TailwindCSS) – Modern Interactive Portfolio - Self Project

Apr, 2026

Front-End Developer

- Engineered a high-performance personal portfolio using **Next.js** (App Router) and **React**, emphasizing scalability, SEO optimization, and maintainable architecture.
- Designed and implemented a fully responsive, component-driven UI using **Tailwind CSS**, improving cross-device usability and accessibility.
- Integrated advanced UI/UX enhancements using **AOS** (Animate On Scroll) and **Typewriter Effect** to create dynamic and engaging user interactions.
- Leveraged **React Hot Toast** for real-time feedback mechanisms, enhancing user experience and interaction clarity.
- Implemented WebGL-based visual effects using OGL to deliver modern, visually rich interface elements.
- Structured the application with reusable components and **TypeScript** for improved code reliability, scalability, and developer experience.
- Deployed via **Vercel** with optimized build performance and seamless CI/CD pipeline integration.

To-Do List App (Reactjs & Go) - Fullstack Task Management System - Self Project

Feb, 2026

Full-Stack Developer

- Developed a full-stack task management application using **React.js** for the frontend and **Golang (net/http)** for backend RESTful services.
- Architected and implemented complete **CRUD functionality** with persistent storage using JSON-based data handling.
- Designed filtering and prioritization features to enhance task organization and usability.
- Containerized the backend using **Docker** and deployed to **Koyeb**, ensuring scalable and consistent runtime environments.
- Integrated frontend and backend services with production-ready deployment on **Vercel**.

EduCourse Backend API (Node.js & MySQL) - Secure Authentication System - Self Project

Oct, 2025 - Dec, 2025

Back-End Developer

- Designed and developed a scalable RESTful API using **Node.js** and **Express.js** for authentication and user management.
- Implemented secure **JWT**-based authentication and authorization workflows, including login, registration, and session handling.
- Integrated **MySQL** database with connection pooling (**mysql2**) to ensure efficient and reliable data operations.
- Designed relational database schemas including users and verification tokens to support authentication flows.
- Built email verification system using **Nodemailer** and **Mailtrap** for transactional email testing.
- Applied **bcrypt** for secure password hashing and validation.
- Deployed backend infrastructure to **Railway**, including environment configuration and database provisioning.
- Ensured API reliability through comprehensive endpoint testing using **Postman** and structured error handling.
- Adopted clean architecture principles (controller-service-model separation) to enhance maintainability and scalability.

YanFlix (Reactjs & TMDB API) - Movie Database Web Application - Self Project

Jul, 2025 - Oct, 2025

Front-End Developer

- Built a responsive movie discovery platform using **React.js** and **Tailwind CSS** with a focus on performance and user experience.
- Implemented global state management using **Zustand** to efficiently manage application state and API data.
- Integrated **TMDB API** to deliver real-time movie data including trending content, search functionality, and detailed views.
- Developed authentication flows (login/register) using **MockAPI** for simulation of backend services.
- Optimized API communication using **Axios** for efficient data fetching and improved performance.
- Designed intuitive UI/UX with consistent design system and smooth navigation.
- Deployed application to **Vercel** for high availability and fast load times.

Web Portofolio (Javascript & Tailwindcss) – Personal Website - Self Project

Apr, 2025 - May, 2025

Front-End Developer

- Developed a responsive personal portfolio website using **HTML**, **CSS**, **JavaScript**, and **Tailwind CSS**.
- Implemented modern UI principles with clean layout structure and responsive design.
- Showcased projects, skills, and personal branding with optimized performance and accessibility.

Videobelajar (Reactjs & MockApi) – E-Learning Platform - Harisenin Project

Jan, 2025 - May, 2025

Front-End Developer

- Developed a scalable e-learning platform using **React.js** with dynamic and responsive UI architecture.
- Managed complex global state using **Zustand**, handling user data, authentication state, and learning progress.
- Designed and consumed RESTful APIs via **MockAPI** for courses, authentication, and user data.
- Implemented authentication system including login, registration, protected routes, and session management.
- Built dynamic course rendering and progress tracking features to enhance user engagement.
- Designed modern UI using **Tailwind CSS** with focus on usability and accessibility.
- Deployed application on **Vercel** ensuring stable performance and fast delivery.

Courses, Training, and Certifications

Harisenin.com - Jakarta, Indonesia	Dec, 2024 - May, 2025
Full Stack Developer Bootcamp	
- Completed an intensive full-stack development program covering modern web technologies and best practices. - Capstone: Designed and developed a fully responsive e-learning platform within 3 months using React.js and modern frontend tools. - Coursework: Advanced JavaScript (ES6+), React.js, State Management (Zustand), Git & GitHub workflows, RESTful API integration - Certificate: <u>Front End Certificate</u>	

Education Level

Bina Sarana Informatika (BSI) University – West Jakarta	Sep, 2026 – Sep, 2030
Bachelor of Information Systems (Future Enrollment)	
State Vocational High School 2 - South Tangerang	Aug, 2019 - Jun, 2022
Major in Multimedia	
Graduated with Honors; completed projects in graphic design, video editing, and basic web development.	

Work Experiences

Internship Frontend Developer – Harisenin.com	May, 2026 – Sep, 2026
Remote / Internship	
- Maintained and enhanced the Edukasistudio (EduCourse) platform by resolving production UI/functional bugs and implementing frontend enhancements across multiple admin and learning management features. - Developed and refined responsive, component-based interfaces using React.js, TypeScript, Inertia.js, Tailwind CSS, and Material UI (MUI) within an existing Laravel-based application. - Debugged and resolved complex frontend issues involving form validation, state management, date pickers, sorting behavior, notifications, image previews, modals, and dynamic UI interactions. - Implemented UI improvements and feature enhancements for modules including notifications, forum discussions, live sessions, employee management, course ratings, dashboard components, team management, and quiz/document features. - Refactored and reused existing React components and hooks to improve code maintainability, consistency, and component behavior while minimizing unnecessary changes to the existing codebase. - Collaborated with backend workflows using Laravel and PHP, integrated frontend data through Inertia.js, and used Git/GitHub pull requests, code reviews, branching, and debugging workflows throughout the development process.	
Freelance Full-Stack Developer	Dec, 2024 – Present
Remote / Project-Based	
- Developed responsive and dynamic web applications using React, JavaScript, HTML, and Tailwind CSS to enhance user experience across devices. - Managed global state efficiently with Zustand for seamless data flow and component interaction. - Created and consumed RESTful APIs using Axios for real-time data fetching and integration. - Collaborated on back-end API development using Node.js and Express.js, enabling robust data handling and authentication. - Designed and managed database schemas in MongoDB for storing user and application data efficiently. - Implemented form validation, conditional rendering, and responsive UI components for a better UX.
