

AYYUBIAN AR RAUFAN KAMAL

FULL STACK DEVELOPER

+62 89523689349 | ayyubian07@gmail.com | [Ayyubian Ar Raufan Kamal](#) | [Web Portfolio Ayyubian Ar Raufan](#)

Tangerang, Indonesia

Junior Fullstack Developer with hands-on experience in building web applications using **React.js** for frontend and **Node.js (Express.js)** for backend development. Skilled in developing responsive user interfaces, consuming RESTful APIs, and managing application state using modern JavaScript tools and libraries.

Experienced in building backend services with **JWT authentication**, email verification, file upload handling, and **MySQL** database integration. Familiar with version control using **Git/GitHub**, API testing with **Postman**, and deploying applications to cloud platforms such as **Railway** and **Vercel**. Highly motivated to continuously improve fullstack development skills and contribute to scalable web applications.

Technical Skills

- **Frontend Development:** HTML5, JavaScript (ES6+), React.js, Zustand (State Management), Nextjs, Typescript, Responsive & Component-Based UI
- **Backend Development:** Node.js, Express.js, RESTful API Development (net/http), MVC / Layered Architecture, Authentication & Authorization (JWT), Password Hashing (bcrypt), Email Verification Workflow (Mailtrap & Nodemailer), Environment Configuration (dotenv), Golang (Go), JSON Storage, CORS Handling, Environment Configuration
- **Databases:** MySQL, SQL (CRUD Operations), Database Schema Design, Connection Pooling (mysql2), MongoDB, PostgreSQL
- **APIs & Tools:** Axios, Postman, Mock API, TMDB API, Git, GitHub, npm / yarn, VS Code
- **Styling & UI:** Tailwind CSS, Bootstrap, Ant Design, Sass, CSS3
- **Devops & Deployment:** Railway (Backend & MySQL Deployment), Vercel (Frontend Development), Koyeb (Backend Deployment), Docker (Containerization), Environment Variables (.env)
- **Design & Prototyping:** Figma, Dbeaver

Projects

To-Do List App (Reactjs & Go) - Self Project

Feb, 2026

Full-Stack Developer

- Developed a full-stack Todo List application using **React** for the frontend and **Golang (net/http)** for the backend REST API.
- Implemented complete **CRUD functionality** with persistent data storage using a JSON file, including filtering by status and priority.
- Built and deployed the backend using **Docker** on **Koyeb**, and connected it to a production frontend deployed on **Vercel**

EduCourse Backend API (Node.js & MySQL) - Secure Authentication Backend API - Self Project

Oct, 2025 - Dec, 2025

Back-End Developer

- Developed a RESTful backend API using Node.js and Express.js to support authentication and user management features.
- Implemented JWT-based authentication for secure user registration, login, and session handling.
- Integrated MySQL as the primary database and managed connections using mysql2 with connection pooling.
- Designed and implemented database schemas including users, verification tokens, and authentication-related fields.
- Built email verification workflows using Nodemailer and Mailtrap for testing transactional emails.
- Applied bcrypt for secure password hashing and validation.
- Managed environment configurations securely using dotenv, separating local and production environments.

- Deployed the backend service to Railway, including MySQL database provisioning and environment variable configuration.
- Tested and validated API endpoints using Postman, ensuring correct request handling and error responses.
- Followed clean architecture principles by separating controllers, services, and models for maintainable code.
- Implemented proper HTTP status codes and structured JSON responses for frontend consumption.

YanFlix (Reactjs & MockApi) - Movie Database Web App - Self Project

July, 2025 - Oct, 2025

Front-End Developer

- Built a modern movie streaming web application using React.js and TailwindCSS, ensuring a clean and responsive interface.
- Implemented Zustand for efficient global state management, handling movie data, user sessions, and UI states.
- Integrated TMDB API to fetch trending movies, detailed film information, search functionality, and ratings.
- Developed authentication features (register, login, session handling) using MockAPI.
- Used Axios for seamless API communication and optimized data fetching performance.
- Designed an intuitive and interactive UI/UX with smooth navigation and consistent styling.
- Deployed the application using Vercel for fast and reliable performance.

Web Portofolio (Javascript & Tailwindcss) - Self Project

Apr, 2025 - May, 2025

Front-End Developer

- Designed and developed a fully responsive personal portfolio website using HTML, CSS, JavaScript, and TailwindCSS, ensuring modern UI practices and clean code structure
- Showcased professional background, projects, and skills with an intuitive layout and smooth navigation.
- Implemented responsive design principles for seamless accessibility across devices and screen sizes.
- Optimized performance and styling consistency to deliver a fast-loading and user-friendly experience.

Videobelajar (Reactjs & MockApi) – Educourse Web app - Harisenin Project

Jan, 2025 - May, 2025

Front-End Developer

- Developed a fully interactive e-learning web application using React.js as the main framework to deliver dynamic and responsive user experiences.
- Implemented Zustand for efficient and scalable global state management, handling user data, learning progress, authentication states, and UI logic.
- Built and structured a custom MockAPI backend, including endpoints for authentication, courses, materials, and user data.
- Integrated all APIs using Axios, enabling fast, reliable, and maintainable data fetching processes.
- Designed a clean and modern interface using TailwindCSS, focusing on usability, accessibility, and consistent UI components.
- Developed login, register, protected routes, and user session handling through a custom authentication system powered by MockAPI.
- Implemented dynamic content loading for courses, categories, and progress tracking to enhance the user's learning flow.
- Deployed the project using Vercel, ensuring stable performance and fast loading times.

Courses, Training, and Certifications

Harisenin.com - Jakarta, Indonesia

Dec, 2024 - May, 2025

Full Stack Developer Bootcamp

- Capstone: Designed and deployed a fully responsive learning platform in 3 months.
- Coursework: Advanced JavaScript, React.js, Zustand, Git & GitHub workflows
- Certificate: [Front End Certificate](#)

Education Level

Bina Sarana Informatika (BSI) University – West Jakarta
Information Technology Major

Sept, 2026 – Sept, 2030

State Vocational High School 2 - South Tangerang
Multimedia Major

Aug, 2019 - June, 2022

- Graduated with Honors; completed projects in graphic design, video editing, and basic web development.

Work Experiences

Freelance Front-End Developer
Remote / Project-Based

Dec, 2024 – Present

- Developed responsive and dynamic web applications using **React**, **JavaScript**, **HTML**, and **Tailwind CSS** to enhance user experience across devices.
- Managed global state efficiently with **Zustand** for seamless data flow and component interaction.
- Created and consumed RESTful APIs using **Axios** for real-time data fetching and integration.
- Collaborated on back-end API development using **Node.js** and **Express.js**, enabling robust data handling and authentication.
- Designed and managed database schemas in **MongoDB** for storing user and application data efficiently.
- Implemented form validation, conditional rendering, and responsive UI components for a better UX.
- Integrated features such as user login, CRUD operations, and dynamic content loading.
- Utilized GitHub for version control and Agile task tracking with tools like Trello and Notion.
